I grew up in various states in the Midwest and by the time I was 20, I realized that I loved sales work. In 1988, I began working for CEPI by opening their first branch location in Berks County, PA. Like the rest of the CEPI operation, my number one goal has always been to provide excellent customer service. I love going out to meet with customers and potential customers. I believe in the company and the products that I sell. I will back up any products and do my best to make sure the customer is satisfied. My personal life consists of being married, having six grown children, and thirteen grandchildren. I love spending time with my family, traveling, and working with the teens in my church.

I began working at CEPI in 1998 and I have a broad knowledge of all current equipment on the market. I also have extensive experience with all facets of the business and I run the day-to-day operations of office administration. In this ever-changing industry, I make customer service a priority as well as client relations in face-to-face sales work. Behind the scenes, I manage inventory and internal reports to help ensure the business' success. I continue to strive to offer a better product at a fair price to the market consumer. I believe that hard work, the fair treatment of customers, and the creation of long term relationships is the key to my personal success. I also believe that this is the key to CEPI's success, whose motto has always been, "Known for service." Outside of work, my personal life includes being happily married and I have one amazing son.

I joined the Pennsylvania branch of CEPI in 2009 as a recent high school graduate. I wanted a consistent job where I had the potential to learn a business and grow with it. I began as a shipper and spent all of my time in the shop. Since I've been with CEPI, I have learned about mixer parts, sales work, and the importance of great customer service. I have become a great asset to CEPI while continuing to run the shop, and lend a helping hand whenever it is needed in taking and making sales calls. I grew up in Berks County and am married to Amanda. I love sports and outdoor activities. I am one of the biggest fans of the Philadelphia Eagles!

Soon after joining the CEPI team in December of 2016, I knew this was the perfect place for me to be. I have always had a knack for shop work, organization and customer service which only made working at CEPI more enjoyable. Hard work and consistency are two very important aspects I hold onto; the core values that helped me grow my lawn care business I manage part time. I am eager and excited to see how I can grow as an employee at CEPI and what the future holds. Family comes first in my life. Aside from the daily work routine I actively enjoy the outdoors and when in season, going to the beach! CEPI provides superior customer service and quality products to a broad number of customers; I am glad to be a member of the Northeast Region of CEPI.
